BOREAL NEWS

Newsletter for Clients and Partners of Boreal Clinic Allied Health Services

Audiology News

Did you know that it takes about 7 years before an individual experiencing hearing loss seeks treatment? If you want to find out how well you are hearing or have questions about potential hearing loss, contact us for an appointment with our Audiologist.

Clinic Changes

We know that the success of our clinic relies on the health and well-being of our dedicated, responsive and caring staff. We also know that we have a responsibility to support our staff in healthy ways and to model a positive work/life balance. For these reasons, **beginning July 4, 2022 Boreal Clinic will be open 4 days a week, Monday to Thursday**. Our clinic is participating in 4 Day Work Week Pilot until the end of December 2022 and would love to share our experience with you, if you are interested in learning more!

Upcoming Plans

As Boreal Clinic has a focus on empowering families and building relationships, we are changing our speech and language therapy model to include caregivers as part of the therapy team. Information will be going to families currently on our caseload and waitlist to explain our new program model and new families will follow this new model right away. Overall we will have 4 different therapy quarters over the year, with special offerings in the summer quarter.

Boreal Clinic will be offering 4 different camps this summer, as well various intensive programs for literacy, articulation and fluency. For more information about the Summer 2022 programs, check out the **Camps** tab on our website or email angela@borealclinic.com.

SLP News

Students from Yukon University did preliminary research on the Social Return on Investment of children receiving speech and language therapy as an early intervention. Their initial findings indicate that for every $1 spend on SLP services there is an $11 SROI for that young person.
